Online Training

[Archived Recording Online Web Training: Health Care Access for Patients with Cognitive Disabilities](#)

Description: People with cognitive disabilities (such as intellectual, learning, communication, Autism, ADHD, and psychiatric disabilities) face numerous barriers to maximizing their health and full potential. During this session, learn how reasonable modifications of policies, practices and procedures ensure that people with cognitive disabilities have access to the care they need.

Communication Access Kits

The Idaho Assistive Technology Project, in collaboration with the Idaho Immunization Program, has developed Communication Access Kits designed to reduce communication barriers that arise at vaccine sites. These kits of communication equipment, tools, and educational resources are being made available for free to 70 Idaho vaccine providers thanks to COVID-19 support from the Administration on Community Living and FEMA. If you have any questions Krista Kramer at [208-885-6097](tel:208-885-6097). kkramer@uidaho.edu

To apply, please complete the survey at <https://app.keysurvey.com/f/41598615/10a7/>

Participants will be asked for usage data and feedback on the usefulness of the various items in the kits. For more information, review slides from Krista Kramer's presentations at:
